## FEATURES

- **New!** added IR decoding functions and an Ubuntu package
- 20x2 character USB LCD Display
- True full-speed USB HID device
- USB full-speed 2.0 support
- 10 custom splash screens, custom timing / looping
- IR receiver connector
- Keypad / LED connector
- USART and I2C connectors
- Supports 8 GPO
- Software support for Windows and Linux platforms
- Open source SDK and source code
- Built in ASCII character set with support for user defined characters
- Electroluminescent green backlight
- On the fly firmware updates
- PicoLCD: 0.74 x 3.28 in.
- Overall size with PCB: 1.47 x 4.57 in.

Compatibility:

**Mini-Box USB LCD** is an intelligent 2x20 character USB LCD display module with InfraRed receiver and keypad interface. This USB LCD display device it's a true USB HID device (not serial or parallel port to USB emulated) supporting high speed data transfers and easy application development without any special drivers needed. picoLCD is not limited to a USB only connection it can be connected thru I2C or USART.

**Mini-Box** has designed picoLCD with the ease of use in mind reducing the time and money needed for integrators to launch a new product with picoLCD. Our sample applications provides windows and linux platform support with open source code and SDK available.

**Mini-Box USB LCD** has built in 8x5 dots ASCII character font with 8 used definable characters and provides 8 GPO (General Purpose Output) pins. Internal EEPROM allows firmware upgrading and splash screen definition. On power on Mini-Box USB LCD is able to show up to 10 user defined splash screens with custom timing, order and led/gpo status.

**Vista SideShow driver support will be added in Q1/2007.** Other Vista SideShow character and graphic hardware LCD display products will be available soon. For more information please send an email to [sideshow@mini-box.com](mailto:sideshow@mini-box.com)

## Uses:

- Rackmount 1u, 2u or larger cases
- Servers systems to display vital data
- Embedded systems
- Small external USB devices used for monitoring or displaying realtime data

## TOP SELLER

**picoPSU-120**  
Tiniest DC-DC ATX power supply

## NEW PRODUCT

**picoPSU-160-XT**  
high reliability 160watt (200watt peak) , DC-DC ATX PSU

**DCDC-USB**  
Intelligent DC-DC converter with USB interface

**picoPSU-80**  
mini-ITX power supply optimized for Atom processors

**M350 Universal Mini-ITX enclosure**  
The Swiss Army Knife of Embedded mini-ITX Computing

**picoLCD 256x64 Sideshow (OEM)**  
picoLCD 256x64 auxiliary display with Vista Sideshow support

**M3-ATX-HV**  
wide input Intelligent Automotive DC-DC Car PC Power Supply

## Software Downloads

### Windows Software

#### [Windows Vista SideShow drivers](#)

Windows Vista driver which adds support for Sideshow gadgets on picoLCD.

#### [picoLCD software suite\(Updated: IR support\)](#)

Windows XP software suite including a TCP Server with GUI client LCD application, a command line application and an utility to update the firmware.

#### [picoLCD Windows SDK\(Updated: IR support\)](#)

Windows source code for GUI client and the TCP server.

### Linux Software

*Linux version doesn't require any extra kernel module (just usb host drivers support) entire LCD can be controled from userspace thru libusb !*

**picoLCD** can be used on linux with the following software:

#### - **LCDProc with keypad/IR support:**

Available in latest release (0.5.3) from [lcdproc homepage](#) or [here](#).

An Ubuntu package preconfigured for picoLCD is available here: [lcdproc\\_0.5.3-1\\_i386.deb](#)

- **LCD4Linux:** download [here](#) or a precompiled binary with configuration for picoLCD: [here](#)

- **picoLCD OEM SDK** (includes RC5/RC6 decoding functions, Keypad support, LCD display functions and custom widgets like histograms, vumeters, custom characters):
